

Announcement

The China National Symposium on Combustion 2019 will be held at Tianjin, Oct. 24-27, 2019. All the technical sessions including the Opening and Farewell ceremony, and poster sessions, will be held at Society Hill Conference & Resort Hotel. The technical program will consist of contributed papers and Work-in-Progress poster sessions. Invited lectures and topical reviews will be presented by eminent specialists.

The China National Symposium on Combustion has been held annually for many years, and has been a most well-known academic conference in Chinese combustion research. In 2018, more than 1,200 delegates from 150 institutions in China, United States, France, Australia, South Korea and Japan attended the China National Symposium on Combustion. Seven plenary lectures and 12 topical reviews were presented by eminent specialists on multiple topics of fundamental combustion research. In total, 264 oral presentations and 320 posters were presented during the symposium.

In history, the language for this symposium was only Chinese. From 2016, this symposium started to accept papers in English. There were 4 sections with presentations in English in 2018. We encourage submissions from attendees who come from different countries or regions. Chinese researchers are also encouraged to submit and present their recent work in English. Instructions for paper format and submissions are available at the meeting website (<http://combust2019.csp.escience.cn/>). Since the paper submission system is in Chinese, please directly email your paper to Prof. Jie Ji (Program Co-chair, jjie232@ustc.edu.cn, University of Science and Technology of China) if you can't read Chinese. Paper Template and Instructions will be provided on the meeting website before April 15th, 2019.

The schedule for paper submissions is:

- **May 15** – Paper submission begins
- **June 15** – Paper submission deadline
- **August 10** – Notification of accepted paper
- **September 25** – Announcement of program schedule

Welcome to submit your papers to this most influential combustion research conference in China!
